The Unstoppable Spirit of Students of Determination

The term "Students of Determination" was introduced by the United Arab Emirates 🇦🇪 (UAE) as part of its efforts to promote inclusivity and positive language regarding people with special needs. In universities around the world, a special group of students shines brightly—students of determination. These individuals show incredible strength and ambition. Their stories inspire not only their classmates but also teachers and communities, proving the power of the human spirit.

Many students of determination are driven by their dreams. They want to pursue their passions and make a difference in the world. They envision a future filled with opportunities for themselves and others.

The influence of students of determination goes beyond their personal success. Their resilience can inspire their peers and challenge stereotypes. By breaking barriers, they pave the way for future generations, showing that determination can lead to achievement. By supporting these students and recognizing their abilities, universities can create environments where determination leads to real accomplishments.

Additionally, the skills they develop like problem-solving and adaptability are valuable in the workforce. Employers appreciate individuals who can overcome challenges, making students of determination highly sought after.

At ADU, the Deanship of Students Affairs headed by Dean **Shakib Farhat** and support from Ms **Roula Qasem**, is providing great leadership and exceptional support to our amazing students of determination.

The attached pictures illustrate my friend Karim's success story at ADU. Let us celebrate Karim and all students who show incredible determination. With support from family and mentors, they can reach their dreams and inspire others.
