Empowering Futures: The Call to Give Back to Our Community

Life is not merely about pursuing a job; it is fundamentally about giving back to our community.

Every time I return to my home village, I am filled with a profound sense of responsibility to support my family, my community, and those in need. I find it difficult to articulate this feeling as eloquently as Dr. [Ashwin Fernandes](#) has done in his message. He writes:

"Over the past two years, I have returned to the place where it all began: **Goa**. In coming back, I have endeavored, in my own modest way, to give back to the soil that shaped me by supporting our schools and their students. Whenever I walk through a school corridor here, I see a reflection of my younger self—a child with dreams that far exceed the limitations of his circumstances.

🎓 That's why my work with the [PACT Foundation](#) transcends just being a cause; it is deeply personal to me! Today, I am excited to share a glimpse of a quiet initiative the foundation has been nurturing: [#GOASUPER100](#)—a transformative scholarship program designed to assist 100 underprivileged Goan youth in accessing quality higher education.

💡 One scholarship program. A hundred dreams. A lifetime of impact. This is not merely another project; it's a mission to ensure that no child in Goa is denied a future simply due to their background.

🤝 I am reaching out to universities, colleges, and training institutions across India and beyond: Join us on this journey. Let's open our doors to those in need. Let's unlock potential. Let's sponsor a brighter future!

📅 The countdown to **8 August** has begun. More details will follow soon, but for now, I have just one request: 🙏 Help us find 100 seats. We will discover 100 deserving stars."

Dr. Ashwin's appeal for sponsorship to support bright students who cannot afford quality education is a noble endeavor. It serves as a reminder that our world is still filled with compassionate individuals who wish to uplift others.
