We are excited to welcome Grades 6–12 students to this year’s Hackathon under the theme **Artificial Intelligence for the Community** in the **#YearOfCommunity**. With over a thousand students participating last year, the hackathon is one of the biggest in the country.

This full-day event will challenge participants to solve real-world community problems using AI. Teams will be supported by their teachers and ADU undergraduate student mentors. Solutions will be presented as posters or vlogs using generative AI for text, image, video, or audio.

We can’t wait to see the creativity and innovation our young participants bring to this community-driven challenge!
