## A Model of Career Progression Stages

We all go through three stages in our career progression: early career, middle career, and near-retirement career. Based on my humble experience, I have documented my insights in the attached diagram. The color coding is important for comparing the three stages. For instance, the red color illustrates how, in the early career, we rely heavily on information; in the middle career, we rely on knowledge; and in the near-retirement stage, we rely on wisdom. I would like to hear your thoughts.
