A delegation of 25 talented teens, aged 11–15, from Shanghai Bilingual School attended AI training

AI has become an integral part of our daily lives, whether we are adults, teens, or even children. At Abu Dhabi University, we are committed to taking this knowledge to the next level, ensuring that the next generation can fully tap into AI's potential for the future.

We were excited to welcome a delegation of 25 talented teens, aged 11–15, from Shanghai Bilingual School to our AI Introduction for Teens course at Abu Dhabi University! This workshop offered them an engaging and interactive introduction to AI concepts and applications. With Abu Dhabi University's strong reputation in computer science and AI, I believe it was the perfect environment to inspire these young learners and showcase the university's academic excellence in these fields.

During their visit, I had the pleasure of meeting the students and sharing insights into the exciting world of AI, hoping to inspire them to dream big about the future of this transformative field.

Through fun lessons and hands-on activities, the students had the opportunity to explore the fundamentals of AI, dive into its diverse applications, and discover how it is shaping the way we work and live. This workshop is not just about learning AI – it is about sparking curiosity, nurturing creativity, and empowering these students to imagine a future driven by innovation.

I am excited to see how these young minds will take what they have learned and use it to generate new ideas and opportunities for the future.

Many thanks to my colleague Ms **Marah Alhalabi**, for running this workshop and to my colleagues **Bassam Mura, MBA, Ibrahim Odhabi** and other colleagues for their great help and to **Alfred Xin Liu** for coordinating this visit.
