1st Women in Artificial Intelligence Forum: Innovating the Future

Yesterday, I delivered the opening speech at the 1st Women in Artificial Intelligence Forum: Innovating the Future, hosted by ADU and led by Dr. **Huma Zia**. This forum was a unique event dedicated to celebrating and advancing the contributions of women in AI. Topics included:

- * AI-driven Climate Action & Sustainability Strategies in the MENA Region
- * The Intersection of AI, Cybersecurity, and Critical Infrastructure
- * Transformative AI Applications in Healthcare, Finance, Agriculture, and more

The event provided an exceptional opportunity to explore cutting-edge advancements in AI, gain insights into responsible AI practices, and engage with pioneers in the field. This forum was a memorable occasion, shaping the future of AI and empowering the next generation of innovators.

ADU has recently launched two new research institutes: the Research Institute for Sustainable Futures and the Research Institute for AI and Emerging Technologies. These institutes are strategically positioned to place ADU at the forefront of cutting-edge research in these high-impact areas.

Many thanks to the leadership of Dr. **Huma Zia**, Prof. **Montasir Qasymeh**, Prof. **Mohammed Ghazal**, and Prof. Fauzia Jabeen PMP, PhD, FHEA .
