Exciting News: Our Book on Green Infrastructure Published!

I recently received our edited book titled "Green Infrastructure and Construction for Sustainable Future", published by **Springer** and co-edited by Prof. Mahmoud Yousef Ghoneim, Prof. **Dr. Evan Paleologos**, Dr. **Hamdi Mustafa Sheibani**. This book features selected papers from the 1st International Conference on Advancing Sustainable Futures (ICASF 2023), a Scopus-indexed conference.

I am particularly excited as this marks my first publication after a long absence due to my leadership roles.

A special thanks to **IEREK Conferences**, our editor, and Springer, the publisher, for their invaluable support in making this publication a reality.

Congratulations to all the authors! Stay tuned for the upcoming ICASF 2025.

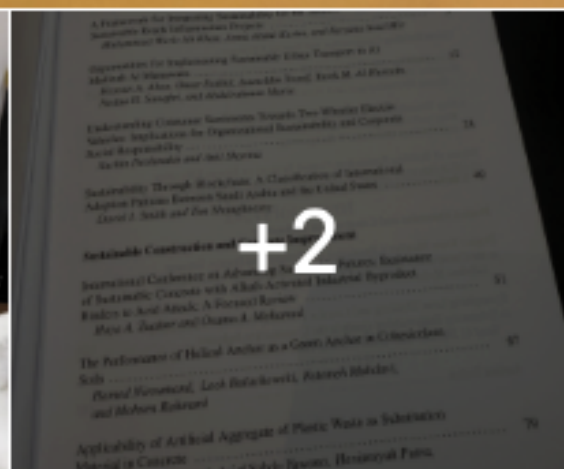

Learn more about ICASF 2025 at :
