What a Leader Should Do and Not Do

Based on my humble experience, I am providing some tips about what leaders should do and not do:

What a Leader Should Do

- Be kind to people, but tough on principles, values, and performance
- Inspire and Motivate
- Build Trust
- Communicate Effectively
- Lead by Example
- Coach and Support Development
- Make Decisions
- Be active on social media

What a Leader Should Not Do

- Micromanage
- Ignore Feedback
- Live and Work in Ivory Towers becoming Inaccessible
- Play Favorites
- Avoid Accountability

By focusing on these principles, leaders can effectively guide their teams toward success while fostering a positive and productive work environment.

Please share your experiences.
