Empowering Higher Education: A Collaborative Workshop in Abu Dhabi

Abu Dhabi University was honored to host a high-impact professional development workshop organized by the UAE **Ministry of Higher Education and Scientific Research** (MOHESR) and the **Commission for Academic Accreditation** (CAA), with participation from quality assurance leaders across the UAE higher education sector.

We are grateful for the collaborative and inclusive approach taken by MOHESR and the CAA—empowering higher education institutions as strategic partners in this transformative journey. By promoting shared responsibility, transparent dialogue, and outcome-based quality excellence, the Ministry and the CAA are empowering universities to take a leading role in shaping impactful and future-ready academic ecosystems.

@Abu Dhabi University is excited about this shift and fully embraces it—not as a checklist, but as a framework that aligns deeply with our strategic priorities. With greater autonomy comes higher accountability, and the true beneficiaries of these forward-looking reforms are UAE students and graduates, who stand to gain from an educational ecosystem that is globally competitive, deeply relevant, and committed to excellence.

We extend our sincere thanks to the visionary leadership of MOHESR and the CAA, as well as to the Commissioners and administrative teams, for their commitment and collaborative spirit in positioning the UAE 🇦🇪 as a global leader in higher education.
