International Accreditation

ADU is internationally accredited by the Senior College and University Commission of the Western Association of Schools and Colleges (**WSCUC**).

WSCUC is the highest form of accreditation available in the USA, and accredits such prestigious institutions as Stanford University, California Institute of Technology, University of California System, and the California State University system.

ADU's College of Business holds international accreditations from the Association to Advance Collegiate Schools of Business (**AACSB**) and the prestigious EFMD Quality Improvement System (**EQUIS**). Only 2% of business schools worldwide have this double accreditation.

Abu Dhabi University's Bachelor's degree programs in Civil Engineering, Electrical Engineering, Computer Engineering, Chemical Engineering and Mechanical Engineering have been accredited by the Engineering Accreditation Commission of **ABET**, and its Bachelor's degree program in Information Technology by the Computing Accreditation Commission of ABET, the global accreditor of college and university programs in applied and natural science, computing, engineering, and engineering technology.

ABET accreditation assures that programs meet a standard to produce graduates ready to enter critical technical fields that are leading the way in innovation and emerging technologies and anticipating the welfare and safety needs of the public.

The Bachelor of Architecture program has earned the Royal Institute of British Architects **RIBA** validation, the highest accolade for architecture programs.

The College of Engineering has also recently received accreditation as an Authorized Training Center (ATC) from the International Air Transport Association (**IATA**). This applies in particular to the Department of Aviation and selected courses.

The College of Health Sciences' BSc in Public Health is accredited by the Agency for Public Health Education Accreditation (**APHEA**).

ADU is one of the youngest universities to receive international academic accreditation from the Western Association of Schools and Colleges: Senior College and University Commission - **WSCUC**. This gives your degree from ADU the competitive global edge and international recognition you need to stand out among your peers in the labor market after graduation.

As a student, why is this important?

- Your international employability prospects have increased significantly as you are now a future graduate of a **WSCUC** accredited university.
- The WSCUC accreditation is not specific to any one college or degree; it is institutional. This means that current and future ADU students can proudly say that they are **WSCUC** accredited.
- Your ADU degree is internationally recognized and transferrable.

Testimonials

Huda Khaled Aanee, Alumni - BSc in Human Nutrition & Dietetics

As a Nutrition and Dietetics Alumni from Abu Dhabi University, I have learned about health promotion and nutrition intervention in chronic and cardiovascular diseases. I have learned how to be kinder to my body and how to help others find peace in theirs through healthy, conscious eating and exercise. I chose this major because I want to help fight malnutrition in all of its forms. The courses exposed me to a variety of skills and expanded my knowledge in food science and processing, case analysis, and research, nutrition care process, counseling, and menu planning, all of which helped me to hone my craft. Throughout my studies, I also developed a strong relationship with my professors and colleagues through frequent class discussions and interactions and am grateful for their guidance and mentorship.

Dr. Aref Al Shehhi, Sheikh Khalifa Medical City, CEO

The pace of change has accelerated as we begin to experience the fourth industrial revolution, which is more digital, robotic, and enabling access to real-time information. With the massive advances in Internet, social media, technology, and automation, we are becoming more aware of our world and the universe. My master's program at Abu Dhabi University made me realize that we must better understand the symptoms and causes of management failure and develop new approaches to managing sustainable development. The Master of Strategic Leadership is designed to prepare professionals to successfully lead in this turbulent yet exciting future that is upon us.

Hessa Ibrahim Alblooshi, Student of Master of Project Management

One of my life goals is to become a great leader, Abu Dhabi University was the right place to start working on that goal. With the help of the professional faculty members and the support of the expert staff members, my journey started in MSc Project Management and ended with prosperity. I would recommend those success seekers to follow their dreams and start by choosing the right place, I chose Abu Dhabi University.
