

The Math Placement Test (MPT) is designed to classify students according to their majors and mathematical knowledge.

How and where to register?

You need to register online from here: <https://www.adu.ac.ae/study/admissions/placement-tests/math-placement-test>. You will receive a confirmation email after registering. Contact amelita.regino@adu.ac.ae if you experience any problems.

Math Placement Test times

Please refer to the Calendars section of the website for more details.

Important notes

- A student can take the test once only. The test will determine which math course a student is eligible to take.
- The test is computerized and is available on <https://Blackboard.adu.ac.ae>, so make sure you are able to log in to Blackboard with any web browser using your ID and password before the time of the test.
- For Engineering and EHS students, the test consists of two parts. Part A, equivalent to MTH100, will include questions on algebra; Part B, equivalent to MTT101, will include questions on pre-calculus. Check the MPT web page for a sample test.
- For Business students, the test is only one part, equivalent to MTG100, which includes questions on Math for life. Check the MPT web page for a sample test.

Using Lockdown browser to take the Math Placement Test

- Your test will be done in computer labs where Lockdown browser is already installed on lab computers.
- You should use google chrome and go to BlackBoard (<https://Blackboard.adu.ac.ae>) and log in with your student ID and password.
- Then go to the MPT course and take the trial test available there before the actual test (if you can).
- Once you click on it, it should launch lockdown browser to start the test. Similarly, will be the procedure for the actual test. No password is needed. If requested, just click enter or submit button.

Results of the Math Placement Test

Results will be posted on the MPT web page 48 hours after the exam. For Engineering and EHS students, the results of the MPT will place the student in one of the three different Math courses - MTH100, MTT101, or MTT102. For Business students, the results of the MPT will place the student in MTG100 or MTB101.

How Engineering and EHS students are placed after taking the Test?

1. High score: Students who score 70% or more in both Parts A and B of the MPT will start with the math course as per their study plan. See table below.
For example, if the first math course in the study plan is MTT101 (Pre-Calculus), the student will be placed in MTT101 (Pre-Calculus) even if they scored 70% in both parts of the MPT. This is because this course is part of their study plan.

2. Medium score: Students who score 70% or more in Part A, but less than 70% in Part B, will be placed in MTT101 (Pre-Calculus).
3. Low score: Students who score less than 70% in Part A of the test will be placed in MTH100 (P) (Algebra).

College	Major	First Math course on Study Plan
COE	Information Technology	MTT101-(Pre-Calculus)
	Interior Design	MTT101-(Pre-Calculus)
	Architecture	MTT101-(Pre-Calculus)
	Aviation	MTT101-(Pre-Calculus)
	All other engineering Majors	MTT102-Calculus I
COHS	Environmental Health & Safety	MTT101-(Pre-Calculus)

How Business students are placed after taking the Test

Students who score 70% in the MPT will start with the math course as per their study plan. See table below. Students who score less than 70% in the test will be placed in MTG100 (Math for Life).

College	Major	First Math course on Study Plan
COB	All other Majors	MTB101
